DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 43 and 44 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Claim 43 recites the limitation "a height of the cell defined between the end walls is relatively small compared to a width of the cell defined by the at least one side wall" and claim 44 recites the limitation "the width of the cell is at least twenty times greater than the height of the cell" which was not described in the specification.

Allowable Subject Matter

3. Claims 1-6, 9-14, 16, 18, 19, 21-31, 33-42 are allowed.
4. The following is a statement of reasons for the indication of allowable subject matter: the instant application is deemed to be directed to a nonobvious improvement over the invention patented in US Patent 5,220,402. The improvement comprises in combination with other recited elements, end walls closing ends of the side wall and having flat reflective surfaces facing inwardly with respect to the cell and lying in a plane extending substantially perpendicular to the axis of the cell, wherein the cell has a

height measured in a direction parallel to the axis substantially equal to a source length and an energy path in the cell is substantially perpendicular to the cell axis.

Response to Arguments

5. Applicant's arguments filed 11 March 2004 have been fully considered but they are not persuasive.

Applicant argues that the limitations of claims 43 and 44 are shown in the drawing figures (*i.e.*, Figs. 1 and 7) of the present application as originally filed. Examiner respectfully disagrees. While the drawings may disclose a ratio between different element dimensions (assuming the drawings are to scale), the drawings do not disclose the criteria between small and not small or that the width of the cell is at least twenty times greater than the height of the cell. For example using the measurements of a 0.4 cm side wall height and 20 cm cell width provided by the applicant, the drawings disclose the cell width is fifty times the side wall height. However the drawings do not disclose the cell width is at least twenty times greater than the side wall height. Nor do the drawings disclose the criteria between small and not small. That is, the drawing at most disclose a ratio (*i.e.*, 50x) between different element dimensions but do not disclose a particular range (*i.e.*, >20x or relative small) of one element dimension relative to another element dimension.

Conclusion

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
